DETAILED ACTION

Finality of Office Action dated July 27, 2007

1. Applicant telephoned the Examiner and stated that the Examiner erroneously indicated that Applicant's amendment necessitated the new ground(s) of rejection presented in the office action dated July 27, 2007. The Examiner agrees. Consequently, the finality of the previous office action is withdrawn and the non-final office action is transmitted herewith. The Examiner apologizes to the Applicant for any inconvenience caused by this error.

Response to Amendment

2. The amendment filed 1/21/03 has been entered.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 18-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Heidemeann (US 5,335,109 published 5,335,109).

With regard to claims 18-19 and 24, Heideman discloses a doped optical amplifying fiber (#3) which operates via stimulated emission. The fiber is pumped via the pump source #4 which causes population inversion thereby permitting stimulated emission to occur. The combined pump signal is then filtered via #6a or #6b. The output of the fiber is subsequently measured by the photodiode (#1).

Art Unit: 3663

With regard to claim 20, the receiving device is the photodiode (#1).

With regard to claim 21, fiber amplifiers are inherently in the form of a ring.

With regard to claim 22, the photodiode (#1) is placed at the output of the amplifying fiber.

With regard to claim 23 (as it is best understood), the photodiode measures the intensity (amplitude²) at the output of the amplifier.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 23 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 23 claims measuring the amplitudes of the signal at the detector. It is not possible to measure an amplitude of an optical signal. Rather, one of ordinary skill in the art measures the intensity (amplitude²) of an optical signal.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deandra M. Hughes whose telephone number is 571-272-6982. The examiner can normally be reached on M-F, 8:30am-5:00pm.
